

# WHOLEGAIN

FAT BALANCER FOR COOL ENERGY, SAFE WEIGHT GAIN AND A SHINY COAT ENRICHED WITH B VITAMINS AND MINERALS

## 1. RECOMMENDED USE

**Cavalor WholeGain is a high-fat concentrated mix that contributes to a fit horse with a radiant coat and stimulates weight gain safely.**

Cavalor WholeGain is a balancer that significantly increases the fat content of the ration and provides the sport horse with important nutrients, including B vitamins and minerals. In this way, it can be used for horses that lack condition or have difficulty recovering. Cavalor WholeGain has a balanced ratio of omega-3 and omega-6 fatty acids that ensure a shiny coat and support immunity.

## 2. PRODUCT PROPERTIES – KEY INGREDIENTS

### Safe weight gain and better condition due to high levels of easily digestible fat

Cavalor WholeGain contains over 22% fat. It has been scientifically proven that a high-fat diet has many advantages. By using fat as a highly concentrated and safe energy source, better digestibility of energy, organic substances and proteins can be obtained with a limited amount of feed. Moreover, fewer reserves are used during sports performances, which means that an optimal condition and top line can be achieved. The quality of the fats also plays an important role. The optimal fatty acid composition is obtained by using various types of vegetable oils. Thanks to the specific composition of fatty acids, there are several additional positive effects, such as better digestibility of the fats, increased immunity and anti-allergic effects.

### Balanced ratio of omega-3 and omega-6 fatty acids for a shiny coat and increased immunity

For good immunity and a shiny coat, an optimal ratio between the essential omega-3 and omega-6 fatty acids is needed. Crude foods such as quality hay and grass are naturally rich in omega-3 fatty acids and low in omega-6 fatty acids. Grains, on the other hand, are rich in omega-6 fatty acids. Horses that are stabled most of the time often have a decreased absorption of essential fatty acids. As a result, they are not able to produce enough omega-9 fatty acids and the balance between omega-3 and omega-6 is also disturbed, which can cause problems with the skin, the heart and physical recovery and reduce immunity. Thanks to the use of oils with a relatively high ratio of omega-3 to omega-6, Cavalor WholeGain has the ideal fatty acid composition to make your horse healthy on the inside and shine on the outside.

# BALANCER

## Gradual and prolonged release of energy for a controlled, energetic horse

Cavalor WholeGain offers energy that is readily available. This energy is gradually released so that horses build up more condition and have greater staying power. Energy from fats is especially important during long-term activity in which muscles that work aerobically use fatty acids as a source of energy. By increasing the fat content of the ration, muscles can also use glucose more efficiently during anaerobic activities.

## Contains a powerful blend of vitamins and minerals for optimal support of the sport horse

Cavalor WholeGain contains not only important minerals but also vitamins. Sport horses have an increased need for B vitamins because, among other things, they play a very important role in energy metabolism. They support the production of red blood cells and are involved in oxygen transport throughout the body.

### Analutical constituents:

CRUDE PROTEIN → 12.6%	CRUDE CELLULOSE → 8.7%	CALCIUM → 2.4%
CRUDE FAT → 22.2%	SUGARS → 5.3%	PHOSPHORUS → 1.0%
CRUDE ASH → 12.6%	STARCH → 17.6%	MAGNESIUM → 0.57%
		SODIUM → 0.33%
		POTASSIUM → 1.0%

### Additives/kg

Vitamins	Trace elements
Vitamin A → 60 000 IU	Energy → 1.13
Vitamin D3 → 8 900 IE	Protein → 94.78 g
Vitamin E → 950 mg	Iron (Iron sulphate monohydrate, 3b103) → 532 mg
Vitamin K3 → 3,75 mg	Zinc (zinc sulphate monohydrate, 3b605) + (zinc oxide, 3b603) → 725 mg
Vitamin B1 → 33 mg	Manganese (manganese sulphate monohydrate, 3b503) → 588 mg
Vitamin B2 → 37 mg	Iodine (calcium iodate anhydrous, 3b202) → 4,38 mg
Vitamin B3 → 71 mg	Cobalt (coated cobalt carbonate pellets, 3b304) → 4.38 mg
Vitamin B6 → 8 mg	Selenium (sodium selenite monohydrate, E8) → 1.75 mg
Vitamin B12 → 0,15 mg	
Folic acid → 15,78 mg	
Vitamin C → 33 mg	
Biotin → 0,56 mg

## 3. INSTRUCTIONS FOR USE

The use of Cavalor WholeGain depends on the intended purpose.

Shiny coat	50 g Cavalor WholeGain / 100 kg BW
More "cool" energy for sport horses	Light work: 75 g Cavalor WholeGain / 100 kg BW Moderate work: 100 g Cavalor WholeGain / 100 kg BW Heavy work: 150 g Cavalor WholeGain / 100 kg BW

Replace part of the normal quantity of concentrated feed with half as much Cavalor WholeGain.

For example: If your horse weighs 600 kg, does moderate work and can use a little more energy, then replace 1,200 g of the normal ration with 600 g Cavalor WholeGain.

Weight gain and improved condition for sport horses	150 g Cavalor WholeGain/ 100 kg BW
---	------------------------------------

In this case, add the amount of Cavalor WholeGain to the normal ration.

Feed as you need: Cavalor WholeGain is a balancer that is only given for a period of time. Give for a maximum of 8 weeks or halve the dose after 8 weeks.

**TIP:** High-fat foods should be increased gradually. Introduce Cavalor WholeGain over a period of at least 5 days and give a maximum of 1 kg of Cavalor WholeGain per horse per day.

## 4. PACKAGING AND STORAGE

Store in a cool, dry place. Close the bag securely after use.  
1 year shelf life.

NUMBER PER OUTER BOX	PACKAGING	EAN CODE
