

BRONCHIX PULMO

FOR PULMONARY SUPPORT & ELASTICITY DURING EXERCISE

1. RECOMMENDED USE

Cavalor® Bronchix Pulmo opens up the airways and supports pulmonary elasticity and resilience during high-intensity training and competition.

A poorly functioning respiratory system is a common factor in sport horses that don't always quite manage to exhibit their full potential. For outstanding performance, efficiently transported oxygen is crucial. Cavalor® Bronchix Pulmo is designed for optimal support of the lungs and airways. It improves the elasticity and resilience of the blood vessels and facilitates respiration. Clinical testing on active racehorses has demonstrated these effects.

2. PRODUCT PROPERTIES – KEY INGREDIENTS

Intense effort taxes the respiratory system and drives the oxygen requirement way up. The increased pressure from the blood flowing along the lungs can stress the air sacs in the lungs. Cavalor® Bronchix Pulmo contains a balanced mix of essential oils that have a synergistic beneficial effect on the airways and support alveolar elasticity.

The *Daucus carota* in Cavalor® Bronchix Pulmo strengthens the walls of the capillaries and, together with *Allium sativum* and *Cupressus*, serves to lower the blood pressure, supporting alveolar resilience and elasticity.

Citrus aurantiifolia, *Eucalyptus globulus* Labil, *Cupressus* and *Glycyrrhiza glabra* clear mucus from the airways, support respiration and neutralise free radicals. Indeed, an efficient oxygen uptake is essential in delivering the best performance.

The effects of Cavalor® Bronchix Pulmo have been demonstrated in a scientific study conducted in cooperation with Dr Emmanuelle Van Erck-Westergren (Equine Sports Medicine Practice), in which sixteen active racehorses from the same stable received Cavalor® Bronchix Pulmo as a supplement.

As management of the stable along with nutrition and training can have a significant impact on the respiratory system, these were kept unchanged during testing.

Endoscopy and a lung wash were performed following the training, both before and after supplementation with Cavalor® Bronchix Pulmo, and those parameters indicative of pulmonary inflammation and haemorrhage were examined.

Fifteen horses were diagnosed with pulmonary haemorrhage (EIHP). After the treatment with Cavalor® Bronchix Pulmo, none of the sixteen horses exhibited haemorrhaging.

Conclusion of the study:

Dr Van Erck-Westergren concluded that using Cavalor® Bronchix Pulmo daily for 25 days significantly reduces the occurrence and severity of EIHP. The results also showed that the product has an anti-inflammatory effect, reducing the signs of tracheal inflammation.

It was noteworthy that the trainer also remarked on his horses' improved endurance, despite substandard performance prior to the use of Cavalor® Bronchix Pulmo.

RESPIRATORY SYSTEM & AIRWAYS

CITRUS AURANTHIFOLIA → 10.000 mg/kg	
ALLIUM SATIVUM → 5.000 mg/kg	CUPRESSUS L. → 0,5%
EUCALYPTUS GLOBULUS LABIL → 10.000 mg/kg	DAUCUS CAROTA → 2,2%

3. INSTRUCTIONS FOR USE

For optimal preparation of the respiratory system before strenuous exercise, we recommend starting with Cavalor® Bronchix Pulmo at least 16 days in advance. If the risk is less high, 6 days is enough.

To do so, administer 20 g (1/3 syringe) per day for at least 15 (of 5) days. On the day before the increased workload and on the morning itself (or the previous evening), administer 30 g (1/2 syringe).

This means 6 syringes will be required to prepare for a race, competition or high-intensity training and only 3 syringes if the risk is less.

The daily maximum dose per horse is 60 g (1 syringe).

For long-term or frequent use, Cavalor Bronchix Pulmo is now also available in a liquid version in a bottle of 1 L. The concentration and dosage remain the same.

It is recommended to administer Cavalor Bronchix Pulmo Liq directly into the mouth with a syringe.

Step 1: Open the bottle cap

Step 2: Cut the middle part of the plug so that there is an opening for the syringe

Step 3: Withdraw the desired amount with the syringe

4. PACKAGING & STORAGE

Keep dry and at a moderate temperature. Usable until 2 years after the production date.

#/OUTER BOX	EANCODE	PACKAGING	# DAYS
4	 5425016902370	Cavalor® Bronchix Pulmo 6 x 60 g - 6 x 0.13 lb	2 x 7
6	 5425016902363	Cavalor® Bronchix Pulmo 60 g - 0.13 lb	2 or 3
6	 5425016902592	Cavalor® Bronchix Pulmo Liq 1 L - 33,8 fl.oz	33
