

# NOURISH YOUR HORSE **INSIDE AND OUT**

FIND OUT HOW OUR PRODUCTS  
CAN **BENEFIT YOU**

## 1 SCIENCE AND PRACTICAL EXPERIENCE AS FUNDAMENTAL INGREDIENTS

The basis of every Cavalor product is research. Science and scientific research motivate us to come up with new insights and constantly seek improvement. We embrace new visions and explore new areas of knowledge. But science is just one of the many ingredients in our products. Our field experience broadens our view on science, ingredients, products and their practical applications. We also want to see with our own eyes that the product does what we expect of it. That's why all Cavalor products are extensively tested for effectiveness and safety. But even after we launch a product, we listen to the findings and experiences of riders, horse owners and many others. We are not satisfied until you notice the difference. You can always count on us.

## 2 COMBINATIONS THAT REALLY MAKE A DIFFERENCE

Because we believe in the synergy of different raw materials, all our products are composed of multiple active ingredients. With every formula, we seek a combination of ingredients that really make the difference. So 1 + 1 becomes not 2 but at least 3!

## 3 HEALTH INSIDE AND OUT

Real health starts inside. Healthy nutrition tailored to the horse's needs is the foundation for optimal health. We complement this with care products that can really make a difference. This is how we want to enable our customers to get the most out of their relationship with their horse.

## TRADITION MIX

Feed for healthy horses full of vitality

With flaked cereals, much easier to digest than unprocessed cereals. Oat-free formula. Cavalor Tradition Mix is a level 1 feed for horses receiving recreational to light training or sensitive horses.

No oats

With flaked cereals

Available in

**Tradition Mix** Per 100 kg BW Min 400 g Max 600 g

20 kg | 550 kg (XL box)

## TRADITION APPLE

Feed for healthy horses full of vitality, with apple slices

Even more delicious thanks to the added apple slices. Oat-free formula. Cavalor Tradition Apple is a level 1 feed for horses receiving recreational to light training or sensitive horses.

No oats

With flaked cereals

Adult horses, recreational sport horses

**Tradition Apple** Per 100 kg BW Min 400 g Max 600 g

20 kg

## TRADITION PELLET

Feed for healthy horses full of vitality

Oat-free formula. Cavalor Tradition Pellets is a level 1 feed for horses receiving recreational to light training or sensitive horses.

No oats

Available in

**Tradition Pellet** Per 100 kg BW Min 400 g Max 600g

20 kg | 750 kg (XL box)

## STRUCOMIX ORIGINAL

Fiber rich feed for healthy horses full of vitality

Contains pre- and probiotics for the development of a healthy intestinal flora, providing the basis for natural resistance. With puffed cereals for good absorption and easy digestion. Totally delicious muesli containing fibre, puffed cereals and herbs for fussy eaters. Cavalor Strucomix Original is a level 1 feed for horses receiving recreational to light training or sensitive horses.

Very tasteful

Optimal gut health & Immunity

No oats

With extra fibers

Adult horses - for recreational sport

**Strucomix Original** Per 100 kg BW Min 300 g Max 700 g

15 kg | 440 kg (XL box)

## STRUCOMIX SPORT

Fiber rich sport feed for active horses

> For active horses

> Optimal gut health & immunity

> Sport essential multi-vitamins

> With extra fibers

It contains long fibres which stimulate chewing and intestinal motility. With puffed cereals for good absorption and easy digestion. With Sport essential multi-vitamins that supply the higher levels needed for sport horses. Cavalor Strucomix Sport is a level 2 feed for horses receiving regular, active training.

Available in

Strucomix Sport

📦 Per 100 kg BW Min 250 g Max 450 g

20 kg

## ACTION MIX

Sport feed for active horses

With flaked cereals, much easier to digest than unprocessed cereals. Cavalor Action Mix is a level 2 feed for horses receiving regular and active training.

For active horses

With flaked cereals

Available in

Action Mix

📦 Per 100 kg BW Min 400 g Max 650 g

## ACTION PELLETT

Sport feed for active horses

The extra large 10mm grain promotes chewing. Cavalor Action Pellet is a level 2 feed for horses receiving regular and active training.

For active horses

Big pellet stimulates chewing

Available in

Action Pellet

📦 Per 100 kg BW Min 450 g Max 700 g

20 kg | 700 kg (XL box)

## PIANISSIMO

Sport feed for nervous horses

Oat-free formula. With flaked cereals for easy digestion and prebiotics and probiotics to support optimal gut function, the foundation for natural resistance. Cavalor Pianissimo is a level 1 feed for horses receiving recreational to light training or sensitive horses.

For nervous horses

No oats

Stress control

Available in

**Pianissimo** Per 100 kg BW Min 350 g Max 650 g

20 kg | 500 kg (XL box)

## PERFOMIX

Sport feed for sport horses

With flaked cereals and puffed cereals for easy digestion and prebiotics and probiotics to support optimal intestinal function. With Sport essential multi-vitamins that supply the higher levels needed for sporthorses. Cavalor PerfoMix is a level 3 feed for horses receiving very regular and intensive training.

For sport horses

Sport essential multi-vitamins

With flaked & puffed cereals

Available in

**Performix** Per 100 kg BW Min 450 g Max 800 g

20 kg | 550 kg (XL box)

## KICK UP

To keep the horse fresh during multi-day events

- > To get languid or tired horses fit again within 2 days
- > Ideal for phlegmatic horses

Available in

**Ponies, recreational horses:** 25 ml/day | **Sport horses:** 50 ml/day

1 L

## AN ENERGY BOOST

For a quick energy boost

- > Improves recovery after work
- > Mix of electrolytes, B vitamins, amino acids, sugars and salt
- > For horses that have to make short & powerful efforts

Available in

**Ponies, recreational horses:** ½ syringe | **Adult horses:** 1 syringe

60 g

To be administered a half hour before and/or immediately after the exertion.

## POW'RED PERFORMANCE

To support the red blood cells

- > Provides more vitality and endurance
- > Vitamins and minerals that contribute to a good basic condition
- > Ideal for sport horses

Available in

**Foals, ponies and young horses:** 25 ml/day | **Adult horses:** 25-50 ml/day

2 L and 5 L

# HIGH PERFORMANCE

Horses have a tremendous athletic ability and are capable of incredibly strenuous work. It is important to understand the stress exerted on the horse's body when asked to perform at its best. Horses performing at the top of their game can benefit from extra support at these peak times.

The supplements in the Cavalor High Performance line are specially developed for performance horses. Highly effective they provide horses with that little extra, because the difference is in the details. You can recognize the products in our high performance range by their silver packaging.

Discover how our high performance range can make the difference.

## Details make the difference

## ENDURIX

Sport feed for performance horses

With puffed and extruded cereals that are easily digestible and provide a slower release of energy. With sport essential multi-vitamins that supply the higher levels needed for horses that have to deliver performance. Cavalor Endurix is a level 4 feed. Level 4 feed is for horses that perform at top equestrian levels.

For performance horses

Sport essential multi-vitamins

With puffed & extruded cereals

Available in

Endurix

Per 100 kg BW Min 600 g Max 800 g

20 kg | 450 kg (XL box)

## SUPERFORCE

Sport feed for performance horses

With puffed and extruded cereals that supply easily digestible starch as a safe source of energy. With sport essential multi-vitamins that supply the higher levels needed for horses that have to deliver serious performance. Cavalor Superforce is a level 5 feed. Level 5 feed is for horses that perform at top equestrian levels.

For performance horses

Sport essential multi-vitamins

With puffed & extruded cereals

Available in

SuperForce

Per 100 kg BW Min 500 g Max 800 g

20 kg

## PEAK PERFORMANCE

Improves the condition and performance of sport horses

- > Stimulates the blood circulation
- > Boost the functioning of the lymphatic system

Available in

**For more energy and faster recovery times Ponies:** 10 ml.

500 ml

**Sporhorses:** 20 ml. Maximum dosage: 40 ml.

The speed of results depends on your horse's current condition. If your horse is in good condition and you need a peak in performance, results will be noticeable after 7 days. To improve condition in a more structural way, we recommend at least 3 weeks of use. Shake well before using!

## LACTATEC

Optimizes muscle function and postpones muscle fatigue

- › Brings your horse supple and fit to the start
- › Anti-oxidants, buffers and essential oils ensure smooth muscles
- › Supports muscle recovery and prevents stiff muscles

Available in

**Powder:** 30 g/day. **In the case of severe acidification:** a four-week course, followed by administration two days before, during, and one day after a competition or intensive exertion. Max 45 g/horse/day

2 kg | 5 kg

**Paste:** 1 syringe/day ½ syringe the evening before and ½ syringe the morning of the exertion.

60 g

## ARTITEC

For optimal protection of the musculoskeletal system during peak moments

- › With nutrients and to prevent overload of the musculoskeletal system
- › Liquid and very tasty
- › For horses that have to deliver top performances

Available in

**Sport horses and top-level sport horses:** 2 tot 3 x 30 ml/day

2 L | 5 L

## FREEBUTE

Supports muscles and joints for better mobility

- › Long-term use possible / Ideal for occasional use such as at a competition
- › Provides fast relief / Helps prevent the consequences of overloading
- › Fast-acting paste to ensure better movement

Available in

**Powder:** 20 g/day. Can be used for a long period or 1-2 days before and during the competition.

800 g

**Paste:** ½-1 syringe the evening before and ½ - 1 syringe the morning before the heavy efforts

60 g

## TAKE IT EASY FORTE

Extra strong stress management

- › Supports breathing and circulation for optimal stresscontrol
- › Makes the horse easier to ride

Available in

**Sport horses and top-level sport horses:** 2 tot 3 x 30 ml/day

60 g

## RESIST + VIT C

Supports the building of the immune system

- › Including antioxidant mix, herbal extracts, essential oils
- › Ideal for horses that travel often and come into contact with other horses

Available in

**Horses:** 45 g **Ponies and foals:** 30 g Maximum: 100 g  
For best results, administer for at least 20 days

900 g | 2 kg | 5 kg

## BROCHIX PULMO

Support and increased elasticity of the lungs during exercise

- › Maximizes oxygen uptake to support performance
- › Scientifically proven effect
- › For horses with sensitive airways

Liq & Paste

Available in

**Leading up to an intensive exertion:** 20 g/day – for at least 6 to 15 days  
**On the day of the intensive exertion:** 30 g on the day before and in the morning of the exertion

1 L | 60 g

Whether you are training for Grand Prix or just riding at home, a proper cool down is just as important as the warm-up. After your training, your horse's body gradually has to return to a state of rest. This will prevent a lot of injuries and ensures your horse can stay a happy athlete. During exertion, your horse's heart rate, body temperature, and in case of any exertion above the anaerobic threshold, lactic acid levels in the blood will all go up. Properly cooling down will allow your horse to break down this lactic acid, bring his muscles back into a state of relaxation, catch his breath and lower his body temperature.

# KEEP IT COOL

And, don't forget the electrolytes! When a horse sweats, it loses large amounts of water and minerals – also known as electrolytes. Electrolytes are a collection of nutrients that are important for many functions in the horse's body. Without quick electrolyte replenishment, performance will be adversely affected and health problems may arise.

## DID YOU KNOW...

### ... that horses cannot store electrolytes?

That's why it's important that they are provided at the right time. The ideal time to offer these electrolytes is directly after training. You could also feed them a maximum of 1,5 hours before training, but immediately afterwards has the best effect. No minerals will be lost that way, and your horse's reserves are quickly replenished.

## MASH & MIX

Very tasteful mash for rehydration

It contains tasty, easily digestible ingredients, like flaked and puffed cereals, bran, linseed and dried vegetables. Soaking the mash ensures that it will be easy to chew. Ideal for mixing with electrolytes or as a light meal after competitions and training.

Rehydrate

Easy to chew

With flaked & puffed cereals

Available in

**Mash & Mix** Per 100 kg BW Min 200 g Max 300 g

1,5 kg | 15 kg

## ELECTROLYTE BALANCE

For replenishing electrolytes after sweating

- > Provides recovery and rehydration after exercise
- > Apple flavour
- > Restores electrolytes after sweating

Available in

**Horses and ponies:** 45 g/day

800 g | 5 kg

## ELECTROLIQ BALANCE

For replenishing electrolytes after sweating

- > Provides recovery and rehydration after exercise
- > Apple flavour
- > Restores electrolytes after sweating

Available in

**Ponies and recreational horses:** 30 ml/day | **Sport horses:** 50 ml/day

1 L | 2 L | 5 L

## COOLSENS

Refreshing and cooling lotion

- > Relaxes the muscles after exercise and supports recovery
- > Including Menthol, Eucalyptus radiata and Tea Tree Oil
- > pH neutral

Available in

Dilute in cold water until you get the desired concentration. Apply with a sponge focusing on the back and limbs. Don't rinse.

500 ml | 2 L

## ICE CLAY

Cooling for muscles, joints and tendons

- > Pure clay that nourishes the coat
- > Contains arnica and rosemary

Available in

**Quick cooling:** Apply a thick layer to the affected tendons, allow to dry and rinse off with cold water.

4 kg | 8 kg

**Slow cooling:** Apply a thick layer to the affected tendons, wrap in wet paper and bandage.

## MUSCLE COOLER

Cooling gel for muscles, joints and tendons

- > Supports recovery, immediate effect
- > Can be applied under bandages
- > For horse and rider

Available in

Apply on the legs and muscles after training

1 L

# MUSCLES, JOINTS, TENDONS AND LIGAMENTS

## MUSCLE MOTION

Keeps muscles flexible and healthy

- › Protection of muscle cells
- › Prevents acidification and muscle damage

Available in

1 kg | 5 kg

Per day: 2 x 15 g – Max 120 g/horse/day

## MUSCLE FORCE

For systematic increase in muscle strength for long-lasting results

- › Stimulates muscle building and slows down muscle breakdown
- › Effect best visible in horses in training

Available in

2 kg | 5 kg

Ponies and recreational horses: 30 g/day | Sport horses: 45 g/day

## FREEBUTE GEL

Relieving, deep-acting and cooling gel

- › Fast relieve and helps repair damaged tissues
- › Stimulates circulation, ideal for sensitive or overworked muscles, tendons and joints
- › Eucalyptus, lavender and tea tree based

Available in

200 ml | 2 L

Massage daily after, or at least 1.5 hours before riding to loosen or relax sensitive muscles. Apply twice daily for a faster recovery from sports injuries. Use gel to rid fatigued legs of toxins.

## ARTI MOTION

For maintaining strong bones and flexible joints

- › With nutrients and to support the musculoskeletal system
- › Contains collagen, MSM and glucosamine
- › For horses that have just started working and older horses that can use extra support

Available in

2 kg | 5 kg

Ponies and recreational horses: 30 g/day | Sport horses: 45 g/day

## ARTI MATRIX

For optimal support of tendons and joints

- › With nutrients and to support the musculoskeletal system and prevent overload
- › Works on different levels
- › For horses with a sensitive musculoskeletal system or who have to make a serious effort

Available in

2 kg | 5 kg

Ponies and recreational horses: 30 g/day | Sport horses: 45 g/day

## ARTI REPAIR

To support healthy tissue during rehabilitation or training

- › Ideal during recovery periods of horses prone to overload
- › Supports the natural regeneration process of joints and ligaments
- › Supports bone metabolism

Available in

2 kg

Supportive use: 45 g/day Maintenance use: 30 g/day. Maximum per horse per day: 90 g. Give for at least 6 weeks.

## CALM

For more focus

- › Helps to control rest and concentration and to reduce the impact on the environment
- › Magnesium, tryptophan & herbs for a calmer horse
- › For introverted and showy young horses

Available in

800 g | 2 kg

Starting dose of 45 g, 2 - 3 days before an expected stressful situation. Can also be used for a longer period with a maximum of 4 weeks.

## BRONCHIX PURE

Supports and relieves the deep airways

- › Softens and relieves the deep airways
- › Reduces irritation and improves long-term resistance
- › Calms a persistent and deep-seated cough

Available in

1 kg

Per day: 50 g for 40 days - Max 120 g/horse/day

## SOZEN

Soothing and relaxing effect

- › Reduces adrenaline spikes
- › Ideal for horses with competition stress
- › For hot or nervous horses

Available in

400 g | 1.5 kg

**Start:** 10 days 30g/day **Maintenance:** 20 g/day  
**Before competition:** start 3 days before competition and adjust to need.

## BRONCHIX LIQ

Cough syrup for a tickling cough and tough mucus

- › Has a soothing effect on the upper respiratory tract
- › Solution to clear the upper airways quickly
- › Relieves a superficial cough

Available in

1 L

Per day: 25 ml for at least 5 days - Max 100 ml/horse/day

## TAKE IT EASY

Manage stress

- › Immediate effect
- › Contains magnesium, tryptophan and B vitamins
- › Horse calm down and focus better at the start

Available in

60 g

Per day: 20 g the evening before, 20 g the morning of and 20 g one hour before the stressful event - Max 60 g/horse/day

## TIP! STABLE CLEANING

Before you sweep the aisle, wet it down or turn out your horses. This will keep them from inhaling all that dust swirling through the air. Never sweep dirt and dust into the stalls. Move it outside instead.

## FIBERFORCE

High-fiber, low sugar and starch feed, ideal for sensitive horses

> Easily digestible & optimal gut health

> Low sugar & starch

> Energy from fiber and fat

> High fiber

The muesli is low in sugar and starch and maintains low blood glucose and insulin levels, so it is safe for horses that are prone to metabolic disorders. Contains a mix of alfalfa, teff and beet pulp. With extrudates that are easily digestible and highly absorbable. Fibre supports digestion and helps to prevent intestinal problems.

Available in

**FiberForce**

📦 Per 100 kg BW Min 500 g Max 2000 g

15 kg | 500 kg (XL box)

The muesli is high in fibre to promote saliva production and neutralise gastric acid. Contains a mix of alfalfa and teff pellets, beet pulp and Timothy stalks that are gentle on the stomach lining. In addition, herbs protect the stomach lining from irritation and buffers help control acid levels in the stomach, maintaining an optimal pH.

Available in

**FiberForce Gastro**

📦 Per 100 kg BW Min 500 g Max 1000 g

15 kg

## FIBERFORCE GASTRO

High-fiber feed ideal for horses with a sensitive stomach

> Acid balancer/buffer

> Low sugar & starch

> With soft fibers

> High fiber

## STRUCOMASH BEET

Mash rich in fiber for good intestinal function

It contains easily digestible sources of fibre, such as Timothy hay, alfalfa and beet pulp flocks, which have a beneficial effect on gut function. The mash is easy to chew and digest, making it suitable for horses that are older or have dental problems, or as a warm treat on cold winter days.

Beet flakes

Easy to chew

No oats

With extra fibers

Available in

**Strucomash Beet**

Per 100 kg BW Min 150 g Max 250 g

15 kg

## SHINE & SHOW

Feed for show horses

Contains linseed, known for its Omega-3 fatty acids, which contribute to a glossy coat. Probiotics promote the development of good intestinal flora. Essential multivitamins combine with minerals for a healthy coat and play a key role in providing enough energy for performance horses.

Shiny coat

Sport essential multivitamins

Optimal gut health & immunity

Available in

**Shine & Show**

Per 100 kg BW Min 450 g Max 700 g

20 kg

## SILHOUETTE

Fiber rich feed for easy keepers

It supplies all the essential nutrients, including protein, vitamins and minerals. Low in starch and sugar, it gives your horse energy from fibre content. It also contains easily digestible proteins with an amino acid profile that is very similar to the horse's own muscles. This helps the horse retain muscle while reaching a healthy weight.

Healthy weight

Low sugar & starch

Supports muscle mass

With extra fibers

Available in

**Silhouette**

Per 100 kg BW Min 150 g Max 250 g

20 kg

## STRUCOMIX SENIOR

Fiber rich feed for senior horses

It contains long alfalfa fibres which stimulate chewing and intestinal motility. Contains pre- and probiotics for the development of a healthy intestinal flora, providing the basis for natural resistance. Oat-free formula. With puffed cereals for good absorption and easy digestion. The higher protein content makes it easy for older horses to maintain their weight and retain their muscles.

With flaked & puffed cereals

No oats

Optimal gut health & immunity

With extra fibers

Available in

**Strucomix Senior**

Per 100 kg BW Min 450 g Max 750 g

20 kg | 450 kg (XL box)

It can be very beneficial for horses to detox every now and again. Detoxing is the process of cleansing the body of harmful waste and toxins. When a horse trains and performs, its body will produce a lot of waste products. By supporting the liver and kidneys and giving the cleansing process a little helping hand, your horse is better able to process these substances. A detox cure purifies the organs that are the engine behind this whole process, and stimulates their function.

#### HOW TO DETOX?

A good detox period starts with extra fibre. During the detox period, switch your horse to a diet of hay and high-fibre concentrate feed, for example Fiberforce or Fiberforce Gastro. Continue this regimen for six weeks. It will keep energy low, provide extra fats and fibre, and keep sugars and starches to a minimum. Switching to a mainly high-fibre diet also gives the intestinal tract some time to rest and recover. You can provide additional digestive support with pre- and probiotics, such as with VitaFlora. Prebiotics and probiotics bring the intestinal flora back to a healthy balance for a well-functioning gut.

#### SUPPORT THE LIVER AND KIDNEYS

The liver is the body's internal detox organ and is responsible for processing nutrients, waste products, medications and harmful substances which are then excreted by the kidneys. The liver and kidneys play a ensure efficient elimination of

# DETOX MAKES SENSE

// **Give the liver  
and kidneys a  
boost every now  
and then**

waste products. So, although the liver and kidneys play a crucial role in the health of our horses, we often overlook the ways we can support these organs.

It is important to give the liver and kidneys a boost every now and then to help them function well. During a detox period, you are cleansing these organs, so it is important not to give your horse any (unnecessary) supplements or medications, but rather just support these organs. You can do this with a regimen of Cavalor Hepato Liq. The herbal extracts in Hepato Liq have purifying and beneficial effects on the liver and kidneys.

## HEPATO LIQ

Liquid herbal blend that detoxifies the liver and kidneys

- > Detox cure for horses and ponies during shedding and/or rest
- > 2 times a year a cure when shedding
- > Suitable for all horses and ponies

Available in

**Horses and ponies:** 2 x 5 ml/day, during 25 days - Max. 6 weeks

250 ml | 2 L

## PASSAND

Supports intestinal passage and normalizes digestion when sand accumulates in the intestine

- > Contains probiotics that support digestion and improve intestinal flora
- > Contains a combination of psyllium and internal oils to achieve a better effect
- > For horses sensitive to sand colics

Available in

**Preventively:** 2 x 50 g per day – 10 days per month  
**For sand accumulation:** 2 x 100 g per day maximum 10 days

3 kg

## GASTRO AID

Creates a healthy environment in the stomach with a focus on neutralizing excess stomach acid

- > Protects the stomach lining from irritation
- > Herbs that protect the stomach lining and help neutralize stomach acid
- > For horses with a sensitive stomach

Available in

**Gastro Aid:** 30 g/horse/day  
**Gastro Aid LIQ:** 60 ml/day, Max. 100 g/horse/day – min 4 weeks  
**Gastro Aid Paste:** Day 1 to 5: 2 syringes/day | Day 6 tot 10: 1 syringe/day

**Gastro Aid:** 1.8 kg  
**Gastro Aid LIQ:** 2 L  
**Gastro Aid Paste:** 60 g

## OILMEGA

Ensures a shiny coat, healthy intestinal flora and improved immunity

- > Balanced mixture of essential fatty acids
- > Rich in omega 3 and 6 fatty acids + high content of vitamin E for a good condition

Add gradually to the ration

**Dosage per horse per day:**

Day 1: 20 ml  
Day 2: 40 ml  
Day 3: 60 ml  
Day 4: 80 ml  
Day 5: 100 ml  
After day 5: 100 ml  
Maximum: 500 ml

Available in

2 L | 10 L

## EMERGENCY 911

To support the intestinal flora

- > For direct impact on intestinal discomfort
- > Fast acting and easily digestible paste
- > Contains probiotics

Available in

**Per day:** 1-2 tubes for sudden discomfort | 0,5-1 tube before transport or stressful situation

60 g

## VITAFLORA

Ensures healthy intestines and good feed intake

- > Prevents acidification of the large intestine
- > Promotes the recovery of the intestinal flora

Available in

**Foals:** 10 g/day | **Mares:** 40 g/day | **Ponies and recreational horses:** 20 g/day  
**Sport horses:** 30 g/day, Max 100 g/day/horse

2 kg

## LAMINAID

Supports sensitive intestinal flora and balances hormonal and metabolic processes

- ▶ A unique, balanced combination of different essential oils including Eucalyptus globulus, Allium sativum and Betula alba

Cavalor LaminAid contains a unique combination of essential oils that are scientifically proven to help relieve the symptoms of laminitis while addressing the underlying causes for long-lasting effect. Each of these has its own specific structure, composition, and effect. Combined, they complement one another with synergistic and powerful effects.

Available in

Day 1: 2 x 50 ml

1 L

Day 2 onwards: 2 x 25 ml/day

For preventive or long-term use (30 days or longer):

2 x 10 ml/day

## PODOSENS

Therapeutic hoof oil for sensitive hooves

- ▶ Provides quick relief for sensitive hooves
- ▶ Supports optimal hoof growth and elasticity of the hoof
- ▶ Based on cloves, birch, lavender and eucalyptus
- ▶ 100% natural

Improving the elasticity in the hoof wall ensures not only quick relief, but also supports the hoof mechanism and improves the quality and growth of the hoof. Unlike other oils that must be used daily, Cavalor PodoSens is economical to use, as it is intended for application to the sole and/or coronet only.

Available in

500 ml

Apply twice daily to the coronet and/or the sole of the hoof. Repeat until symptoms have disappeared.

## HOOF AID

Supports healthy hoof growth and quality

- > High dose of biotin to improve hoof quality
- > Rich in vitamin A, D3 and the amino acid methionine

Available in

Per day: 30 g. Max 100 g/horse/day

800 g

## HOOF AID SPECIAL

To promote hoof formation

- > To heal problem hooves
- > Contains not only biotin, but also yeasts, amino acids and fatty acids
- > Contains every nutrient that contributes to the development of a healthy hoof

Available in

Pony: 50 g/day = 1/2 measure. Horse: 150 g/day = 1,5 measure. 1 measure = 100 g.  
Maximum per horse per day: 420 g.

5 kg | 20 kg

## PODOGUARD

Hoof oil for improved hoof quality

- > Protects against bacteria
- > Optimizes the moisture balance of the hoof
- > 100% natural

Available in

Several times a week on a cleaned, dry hoof

500 ml | 2 L

## DRY FEET

For dry hoof sole and horn radius

- > Actively supports hoof immunity
- > Based on pre- and probiotics, provides protective and good micro-flora
- > Also use preventively
- > 100% natural

Available in

In case of a soft frog or sole, apply the product to the cleaned hoof twice a day or use preventively

250 ml

## SOLEMATE

Hoof paste for sensitive hooves

- > Natural care of hoof traumas and sensitive hooves
- > Functions as a cushion and softens
- > Based on English salt, Arnica, Iodine and Pine Tar
- > 100% natural

Available in

Clean and dry the hoof. Apply the product with wet hands and completely cover the hoof and digital cushion. Cover with wood shavings or paper

1.6 kg

## NUTRI FIBER

Vitamin- and mineralbalancer enriched with extra fiber

› Multi-vitamines et minéraux

› Very tasteful

› Easily digestible & optimal gut health

› High fiber

Cavalor Nutri Fiber is specially developed for horses that are fed forage and little or no concentrates. Cavalor Nutri Fiber contains essential fibre, vitamins, and minerals as well as pieces of carrot and apple. Even the fussiest eaters love it. Cavalor Nutri Fiber is a delicious, wholesome mix that won't overload your horse with calories and energy.

Available in

**Nutri Fiber**

**For horses that get only forage:** Per 100 kg BW 100-200 g  
Depending on workload

15 kg

**Fed together with concentrate feed:** Per 100 kg BW 50-100 g

## WHOLEGAIN

Fat balancer for cool energy, safe weight gain

Cavalor WholeGain is ideal for horses that lack condition or have difficulty gaining weight. It adds fat to the feed ration and provides important nutrients for sport horses, including B vitamins and minerals. Cavalor WholeGain has a balanced ratio of omega-3 and omega-6 fatty acids that provide a shiny coat and boost the immune system.

Safe weight gain

Cool energy from fat

Shiny coat

Sport essential multi-vitamins

Available in

**WholeGain** **For a shiny coat** Per 100 kg BW Max 50 g  
**For cool energy** Per 100 kg BW Min 75 g Max 150 g  
**For weight gain** Per 100 kg BW Max 150 g

20 kg

## VITAMINO

Protein balancer for an outstanding muscling

This balancer is a source of high-quality proteins that are easily digestible and have a specific amino acid profile, making an optimal contribution to developing more muscle mass. Contains soya, alfalfa and potato protein that contain all the essential amino acids in the right proportions, for maximum efficiency in developing strong muscles.

Healthy weight

Sport essential multi-vitamins

Highly digestible protein  
Balanced amino acid profile

Available in

**VitAmino** Per 100 kg BW Min 100 g Max 200 g  
Before use consult the instructions on [cavalor.com](http://cavalor.com).

20 kg

## NUTRI SUPPORT

Mixture of minerals and vitamins

- › For when feed contains insufficient vitamins and minerals
- › For recreational horses

Available in

**Ponies and recreational horses:** 50 g/day | **Sport horses:** 100 g/day

5 kg | 20 kg

## NUTRI GROW

Mixture of minerals and vitamins for youngstock and breeding

- › For when feed contains insufficient vitamins and minerals
- › For foals, young horses and breeding mares

Available in

**Foals and ponies:** 100 g/day | **Young horses:** 150 g/day  
**Gestating and lactating mares:** 200 g/day

5 kg | 20 kg

## NUTRI PLUS

Mixture of minerals and vitamins for sport horses

- › For when feed contains insufficient vitamins and minerals
- › For sport horses

Available in

**Ponies and recreational horses:** 100 g/day | **Sport horses:** 150 g/day

5 kg | 20 kg

## PROBREED MIX

Feed for pregnant and lactating mares, foals < 1 year

This mix supports the good development and balanced growth of foals and keeps mares in good condition. With puffed cereals for good absorption and easy digestion. The right calcium/phosphorus/magnesium ratio ensures good bone development and density. The ideal combination of organic copper, zinc and manganese ensures good development of bones, joints and tendons.

Breeding essential multi-minerals

Optimal gut health & immunity

Steady growth

Available in

**Probreed Mix** **Gestation** Per 100kg BW Min 250 g Max 500 g  
**Lactation** Per 100kg BW Min 375 g Max 625 g  
**Foal** Per 100kg BW Min 250 g Max 450 g

20 kg | 550 kg (XL box)

Per 100kg/220lb expected mature weight

## PROBREED PELLET

Feed for yearlings and young horses up to 3 years old

This mix supports the good development and balanced growth of foals and keeps mares in good condition. The right calcium/phosphorus/magnesium ratio ensures good bone development and density. The ideal combination of organic copper, zinc and manganese ensures good development of bones, joints and tendons.

Steady growth

Breeding essential multi-minerals

Available in

**Probreed Pellet** **Gestation** Per 100kg BW Min 250 g Max 500 g  
**Lactation** Per 100kg BW Min 375 g Max 625 g  
**Foal** Per 100kg BW Min 250 g Max 450 g

20 kg | 550 kg (XL box)

Per 100kg/220lb expected mature weight

## START & GO SOFT

Feed for weanlings

The nutritious, tasty and easily digestible extrudates are perfect for teaching foals to eat concentrated feeds and prevent growth stops. The extrudates are easy to absorb, easy to digest and tasty, facilitating a smooth transition after lactation.

Start to eat

Breeding essential multi-minerals

Steady growth

Available in

**Start & Go Soft** Per 100 kg BW Min 250 g Max 450 g  
 One month before to one month after weaning

15 kg

## JUNIORIX

Feed for yearlings and young horses up to 3 years old

The muesli promotes steady growth and development from yearling to adult horse. With puffed cereals for good absorption and easy digestion. The right calcium/phosphorus/magnesium ratio ensures good bone development and density. The ideal combination of organic copper, zinc and manganese ensures good development of bones, joints and tendons.

Steady growth

Breeding essential multi-minerals

Optimal gut health & immunity

Available in

**Juniorix** Per 100 kg BW Min 300 g Max 400 g

20 kg | 500 kg (XL box)

## VENUS

Support during the mare's fertility cycle

- › Suppresses typical behaviour during estrous
- › Does not block the cycle

Available in

**Ponies:** 2 x 5 ml/day | **Horses:** 2 x 10 ml/day

500 ml | 2 L

## COLOSTRA

Milk powder with colostrum

- › Administer within 24 hours after birth
- › It is vital to provide your foal with the necessary antibodies
- › Primary source of antibodies shortly after birth

Available in

**Within 24 hours after birth:** 100 g in 200 ml water

100 g

## HYPOLAC

Easily digestible instant milk

- › For a motherless foal or if the mare gives too little milk
- › Equivalent nutritional values as natural mare's milk

Available in

Dilute in water. Detailed instructions on [cavalor.com](http://cavalor.com).

10 kg

### TIP! START SMART. START STRONG.

Every breeder wants to have a healthy and strong foal. A good gestation period, a safe foaling and thereafter a stable growth of the young horse are all aspects that contribute to success. Good management in general, so for such things as stabling, time in the pasture and social contact, is also an important factor. Nutrition in particular, however, is one of the most important building blocks for the foal to develop into a healthy and strong horse. **Want to know more about a smart start for your foal? Download the free whitepaper.**

## FLYLESS

Anti-insect spray

- > Protects against annoying flies, horseflies, mosquitoes and ticks
- > Skin-friendly and pleasant fragrance
- > Icaridin-based
- > For horse and rider

Available in

Spray on skin or coat from a distance of 15 cm.

500 ml

## SWITCH

Protects against uncontrollable itching and soothes quickly

- > Keep the culprit away
- > Heals and moisturises wounds caused by chafing

Available in

Apply directly or on a cloth 1 or 2 times per day until improvement is observed. Use 2 or 3 times per week as a preventive measure before the start of the mosquito season.

500 ml

## PROSCENT

Neutralizes odour of horses and their sweat

- > Ideal during a summer ride
- > Has a lovely perfume
- > Lemon, eucalyptus, lavender and tea tree based
- > 100% natural

Available in

Spray directly on the coat. Shake well before using.

500 ml

## DERMA WASH

Hygienic shampoo that supports the health of the coat

- > Improves the general hygiene of the skin
- > Contains conditioners that softens the coat
- > pH neutral
- > Also suitable for cleaning leather, saddle cloths and blankets

Available in

Add a little bit (+- 30 ml) to a bucket of lukewarm water or apply directly with a sponge. Allow to soak in, then rinse thoroughly with water.

500 ml

## DERMA SPRAY

Pre- and probiotics for the skin

- > Strengthens the skin's natural resistance
- > Improves recovering capacity
- > pH neutral

Available in

Spray 2 x per day on the affected area. Can also be used preventively.

250 ml

## STAR SHINE

Long-acting conditioning spray for coat, tail and mane

- > Gives brilliant shine and volume
- > Makes mane and tail tangle free for days
- > Contains mix of high quality silicones
- > pH neutral

Available in

Apply on the wet coat, mane, and tail immediately after washing. For best results, brush the horse afterwards with a wool or cotton cloth.

500 ml | 2 L

## BIANCO WASH

Deep cleansing shampoo

- > Perfect for tough stains and white fur
- > pH neutral

Available in

500 ml

Use diluted in a bucket of water or apply a small amount directly on stains for amazing results.

## MUDDOC

Moisturising mug ointment

- > Stimulates the blood circulation
- > Aloe vera, eucalyptus, lavender and tea tree based
- > 100% natural

Available in

200 ml

Wash the leg first with a disinfectant shampoo like Cavalor Derma Wash. Dry the pasterns with a cloth before applying daily. Continue to use as long as needed to prevent the mud fever from returning.

## BIANCO SPRAY

Removes the most stubborn stains

- > Immediate effect
- > No water needed
- > pH neutral
- > Lovely aroma

Available in

200 ml

Apply the powder to the stain and leave in for a few minutes. Then wipe off stain and excess powder with a dry cloth.

## LURAX

Calming skin ointment, soothes and heals

- > Stimulates wound healing and reduces scarring
- > Makes hair grow back faster to its original colour
- > Can also be used for sunburn

Available in

200 ml

Apply daily to the cleaned wound or irritated skin to ensure a natural and fast recovery.

## EQUI WASH

Refreshing and healing

- > Cleanses and ensures a shiny coat
- > With provitamin B5 and glycerin
- > pH neutral

Available in

500 ml | 2 L | 2 L jar with pump

Dilute with (warm) water, rub well into the coat and rinse with lukewarm water.

## DID YOU KNOW...

... Cavalor Derma Wash is also the perfect product for cleaning tack, saddle pads and brushes? You can even just add it to your washing machine, without any additional soap or other products. That's handy!

## CRUNCHIES

High-fiber snack made with carrots

- > Ideal reward
- > Good absorption

Available in

1.5 kg

## FRUITIES

Healthy berry-flavoured horse treats

- > Ideal reward
- > Good absorption

Available in

750 g

## SWEETIES

Healthy, coconut-vanilla flavoured horse treats

- > Ideal reward
- > Good absorption

Available in

750 g

## STABLE ROCKY

Salt stone to supplement the diet

- > Suitable for all horses and ponies

Available in

2 kg

## LEATHER SHINE

Nourishes leather

- > Anti-slip
- > Protect against moisture

Available in

200 ml

Apply a small amount to the leather with a cloth or sponge. Rub in until the white colour has disappeared. Then polish the leather with a clean cotton or wool cloth to make it shine.

## LEATHER SOAP

Glycerine soap for leather

- > Mild soap
- > Makes the leather shine

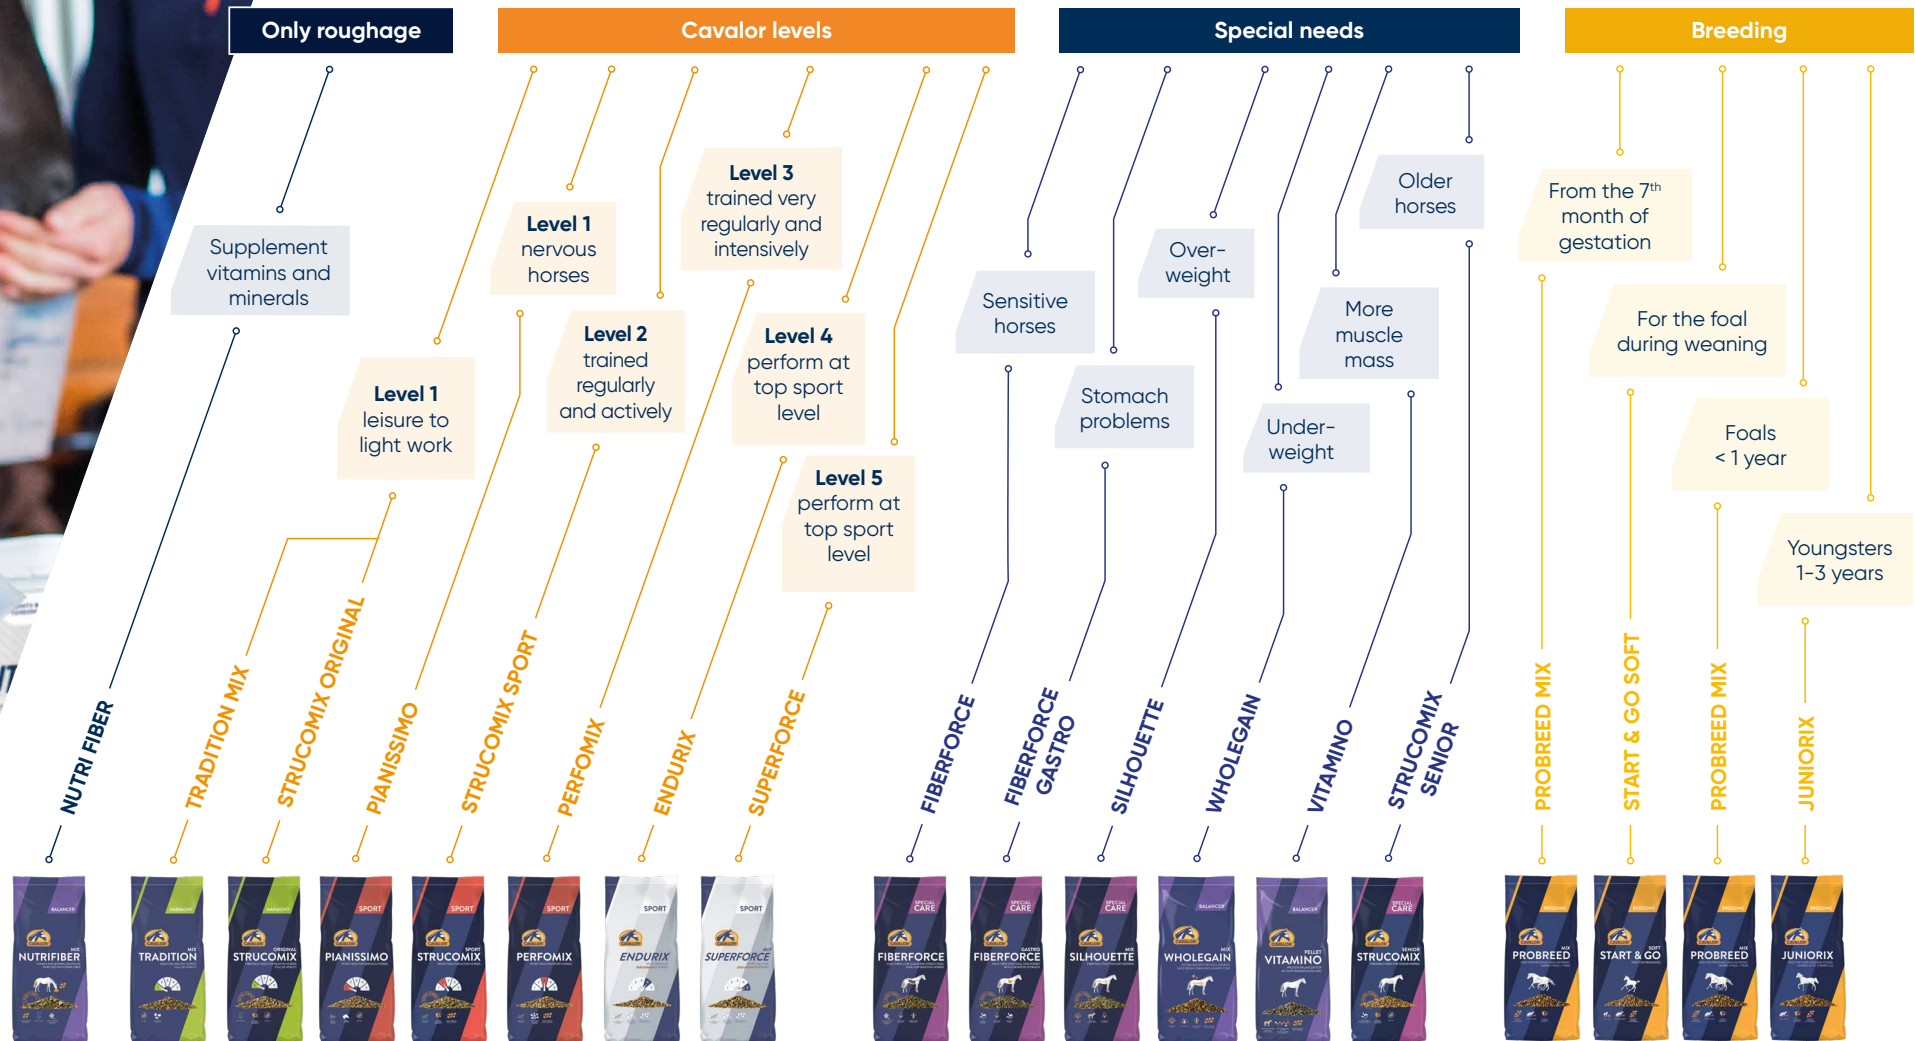

Available in

500 ml | 2 L

Before using, wipe any coarse dirt, sweat, or hair off the leather. Apply to a damp cloth or sponge and rub it into the leather. After drying, rub with a dry cloth or soft brush to make the leather shine and remove any soap residue.

# FEED AS YOU NEED

Every horse is different and has different needs. At Cavalor, we say: feed as you need. Match your horse's feeding to your specific needs. Here, your horse's breed and weight play an important role, as well as the intensity of the training you give your horse. **Remember: high-quality roughage in sufficient quantity is always the basis of good nutrition.**

Finding it hard to find the right feed for your horse? Or looking for advice on which feed best suits your horse? At [MyCavalor.com](http://MyCavalor.com) ([www.mycavalor.com](http://www.mycavalor.com)), you can easily configure your horse's feed according to his needs. Prefer to ask us personally? You can! Simply send an email to [info@cavalor.com](mailto:info@cavalor.com) or call our Consumer Line at **+32(0)9 220 25 25**.

You may have already noticed that Cavalor's feeds mostly come in the form of a muesli. We love mueslis – for several reasons, but above all for their structure and ingredients that you can see.

# WE LOVE MUESLIS

## MORE CHEWING

Texture is the biggest advantage of feeding mueslis. In addition, many mueslis in the Cavalor range contain extra added long fibre. Texture and long fiber bring extra bulkiness to the diet which is important because it will stimulate horses to chew more and eat slower. This means better nutrient digestion but also helps maintain a healthier stomach environment. Did you know that one kg of muesli requires 900 chews, compared to 600 chews for one kg of pellets? So your horse has to chew muesli longer, eating slower and producing more saliva. Saliva contains sodium bicarbonate, a good buffer that neutralises excess stomach acid. More texture and long fibers in the feed also stimulates better gut movement and promotes optimal intestinal health.

## BETTER DIGESTIBLE NUTRIENTS

Mueslis contain more processed grains (flaked, puffed and extruded). This way, the nutrients from the grains are more digestible and absorbable by the horse.

## VISIBLE INGREDIENTS

In addition, with a muesli you can see what you are giving your horse: the individual raw materials are mostly clearly visible so you can see exactly what your horse is being fed.
